Experience

Web Developer | The Predictive Index

Mar 2021 to Aug 2022, Westwood, MA

Developed user-friendly, performant web pages, templates, and reusable components from design mockups using both client and server-side scripting languages.

Built a single-page, virtual event platform to host the annual Talent Optimization Conference attended by 500+ people around the world, complete with live chat functionality, user authentication, and switchable video feeds.

Championed accessibility in our web products by overhauling compliance to align with the Web Content Accessibility Guidelines (WCAG).

Animated engaging vector animations with the GSAP library to communicate the value of our products and help users visualize concepts.

Web Developer | Bartlett Interactive

Jun 2019 to Feb 2021, Concord, MA

Developed transformative, bespoke websites and digital solutions for schools, libraries, art centers, and other non-profit organizations.

Collaborated with designers to build web pages and components with HTML, CSS-preprocessors, PHP, JavaScript, and modern development workflows built on the WordPress platform.

Balanced projects, requests, and communications from 30+ active clients across the country in a timely, organized manner.

Pitched agency services to prospective clients, presented detailed project plans estimating budgets and timelines, and built trusted relationships with stakeholders.

Education

University of Massachusetts, Amherst

B.S. Multimedia Informatics, Sep 2013 - May 2018

Designed my own major with a curriculum that merges Computer Science, Art, and Marketing, including courses on web technologies, human-computer interaction, digital media, and internet marketing.
